

Outdoor Lockers

Built to withstand decades of extreme heat, rain storms, snow, and hail.

 -40° to 140°F Operating Conditions

Protect Against the Elements

Industry's longest roof overhang

46" long for added protection from rain, snow, and hail.

Durable powder-coat

Corrosion-free through 20,000 hours of salt-spray testing.

Climate-controlled electronics

Thermal Electrical Cooling Device electronically cools and warms components based on the temperature outside.

Weather-resistant compartments

Rain-deflection lips on every compartment and outdoor-rated gaskets keep contents dry.

Brackets and concrete anchoring

Bolted system built to withstand Category 5 winds.

A60

galvannealed steel

Harder and more scratch-resistant than galvanized steel.

50% more rust-resistant than G40 steel.

2x

Luxer One's 12-gauge steel is twice as thick as 18-gauge steel.
